SmartCoaster

A coaster that knows when you drink.

RED DOT 2026
Product Design

THE PROBLEM

Staying hydrated is a habit, not a reminder. Phone notifications live on another screen and are easy to ignore; cups do not know how much you drank.

THE INSIGHT

Drinking water is a 'put the cup down' action. The coaster is the only object that is always there.

THE DESIGN

Weight is the input. Place the cup, lift, drink, put it back - the difference is the sip. Refills are ignored. The front face carries only a 26 x 7 OLED window and one button: no light ring, no light seam. The single functional seam is the 0.5 mm floating gap between top plate and shell.

THE EXPERIENCE

When it is time to drink, the window shows a quiet reminder - no glow, no sound. It shows today's progress only when needed, then sleeps after 8 s. Seven days on a 500 mAh battery; BLE sync only on demand.

SUSTAINABILITY

30% PCR shell, FSC moulded-pulp packaging, no glue, replaceable battery, four screws to repair.

SPECIFICATIONS

Size / weight	100 x 100 x 18 mm / 155 g
Range	5 kg (HY928D + HX711, 24-bit)
Goal	2200 ml/day (app adjustable)
Display	0.91" 128x32 OLED, 26 x 7 window
Feedback	on-screen only (no LEDs)
Wireless	BLE 5 (NimBLE, 0xFF00)
Battery	500 mAh, 7-day class
Charging	USB-C

CMF

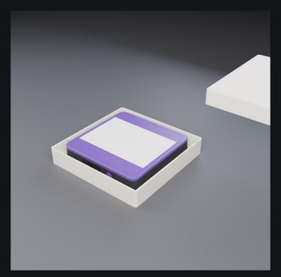

Lumen Violet · Charcoal · Moss · Sand · Graphite
